

Infection Control is *everyone's* responsibility. Together, we can add more layers of patient protection.

Nationwide, the Centers for Disease Control reports a staggering number of deaths, *every year* in patient-occupied facilities due to construction-related activities.

ICRA-Trained Professionals Specializing in Construction

ICRA Best Practices in Healthcare Construction is an 8-Hour Awareness Training to ensure that your employees recognize the spread of contaminants and know the proper procedures for containment of infectious agents at an occupied healthcare facility. Attendees will learn about the importance of containing pathogens, controlling airflow, as well as recognizing and properly disposing of hazardous materials.

Choose one of two days for this **FREE** training opportunity:

November 10, 2017
8am - 4pm
RSVP by Nov. 8

OR
